

ROLLOVER PLOW

KEEPING AHEAD OF THE CUTTING EDGE™

MODEL "WRO" ROLLOVER PLOW

Innovative Design Enhances Efficiency

Wausau's Rollover Plow is uniquely designed to make each pass a working pass in calm or strong wind conditions. Its 180° rotation allows for fast and efficient change over.

Continuous 180° Rotation. Effortless rotation when changing from one side to the other.

Full-Welded Support Braces. Continuous welds secure frame members for added strength and reliability.

Standard Support Shoes. Four support shoes on each side keep weight evenly distributed during high-speed operation for maximum cutting edge support.

Deep Moldboard Curvature. Concentrates snow into a high velocity stream for maximum casting distance and efficiency. Eliminates overspray for optimum operator vision.

Upper Right: The rotating mechanism consists of hydraulic motor coupled to a planetary gearbox.

Middle Right: Heavy-duty moldboard support braces add strength.

Lower Right: Eight moldboard Support shoes are standard on all Wausau rollovers.

MODEL	OVERALL LENGTH	CUTTING WIDTH	NOSE HEIGHT	DISCHARGE HEIGHT	RIBS	WEIGHT
WRO	12'6"	10'	18"	72"	5	3,700 lbs.
