

# ULTI-MATE HITCH

KEEPING AHEAD OF THE CUTTING EDGE™

ULTI-MATE  
"HANDS FREE"  
HITCH

- **WAUSAU™ Ulti-Mate Hitch allows hands-free interchange of the plow and other attachments.**
- **The Ulti-Mate Hitch is hydraulically operated (plow lift, swing, and lock) and designed for power reversible runway plows.**
- **The entire process of hitching or unhitching is possible in less than 2 minutes, by one person, and is connected with hydraulically operated lock pins.**

## FEATURES:

- Construction: Welded tubular and plate steel.
- Two (2) 360° swivel adjustable, pneumatic, dual caster wheel assemblies
- Hitch: Parallel lifting type consisting of two (2) parallel tubular push arms of 3" x 3" x 5/16" wall steel tubing so when the plow is carried in the raised position, and angled right or left, it remains level to the pavement
- Hydraulic double-acting-lift cylinder, 4" bore x 16-3/8" stroke, with a 2" diameter rod
- Four (4) heavy-duty braces on top of the frame, which can adjust the cutting edge angle to positions of 65°, 75°, and 85°
- A mechanical transport lock takes the weight of the plow off the hydraulic cylinder during transport, and acts as a safety in the event of a hose failure during transport
- Once detached, the mold board and push frame will rest on the ground, caster tires, and the cutting edge only
- No blocking is needed
